### **DETAILED ACTION**

Receipt is acknowledged of the information disclosure statement filed 08/22/2003. Although a translation was indicated for the 2-13580 document, none could be found attached to the foreign document. As such, this reference could not be considered.

### ***Election/Restrictions***

Applicant's election without traverse of Group II in the reply filed on 11/10/2006 is acknowledged.

Claims 1-5 and 7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/10/2006.

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6, 8-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification fails to clearly define the term "apatite forming ability". Clarification is requested in that it is unclear what this entails.

Japanese unexamined patent application , First Publication No. Sho 62-34559 is cited for its disclosure of coating a base with a hydroxyapatite film.
